

EGLE – Jan 2024

PFOS data received from Brandon Armstrong MDNR 12-18-23.

“The PFOS concentrations in the Houghton Lake fish fall somewhat in the middle of the concentrations that we have observed in these species across the state. Note in the last two figures, I have removed Clarks Marsh (Iosco County) from the analysis due to significant contamination of the fish from those ponds (>1,000 parts per billion PFOS)”

EGLE FCMP Walleye Fillets

EGLE FCMP Yellow Perch Fillets (removed Clarks Marsh)
